

Program Tutorial

The amount of blinds = Effective stack - the minimum stack among participants. If you have 15bb and the opponent has 5bb, the effective stack is 5bb. If you have 3bb and the opponent has 12bb, the effective stack is 3bb. The effective stack is the maximum chips from opponents that you can win.

REMEMBER ! In program We choose not our stack, but Effective stack !

Call vs Allin 8bb: Means to call an all-in with 8bb or under stack size.

MR: Minimum raise, 2xRaise.

Allin: Going all-in with all your chips.

Push: When we go all-in first.

2pl: Two opponent players.

2pl MR: 1 opponent minraises, second opponent calls.

2pl Limp: 1 opponent limps, second opponent calls.

2pl Allin: 1 opponent pushes, second opponent calls all-in.

Call vs Raise: When we call the opponent's raise to a maximum of 3bb from our limp or bet.
